

CP317A – Final Project Grading Rubric (20%)

Criteria	Marks	Excellent (Full Marks)	Good (Mid Range)	Needs Improvement (Low Marks)
System Functionality & Code	6	System installs and runs correctly; all core features function as described; code is clean, well-structured, and follows good practices.	System runs with minor issues; most features function; code structure is acceptable with some inconsistencies.	System does not run reliably; major features incomplete; poorly organized or undocumented code.
Final Report (PDF)	6	All eight sections included and well-developed; design and testing documentation is clear and thorough; ethical analysis is detailed and insightful.	Most sections included but lacking depth in some areas; design and testing information somewhat limited; ethics section moderately developed.	Missing several required sections; unclear or incomplete documentation; ethics section superficial or absent.
Demo Video & Presentation	4	Professional and clear 10-minute presentation; demonstrates system effectively; strong communication and high-quality slides.	Presentation is understandable but lacks clarity or depth in some sections; minor issues with timing or delivery.	Weak presentation; unclear demonstration; missing required components; poor slide quality or communication.
Process (Backlog & Blog)	2	Backlog accurately reflects completed and remaining work; blog shows consistent contributions and detailed meeting records.	Backlog mostly accurate with minor gaps; blog contains entries but lacks detail or regularity.	Backlog incomplete or inaccurate; blog missing or shows minimal team activity.
User Manual & Usability	2	Instructions are clear and complete; evaluator can easily install and test the system; UI is intuitive and user-friendly.	Instructions mostly clear but missing minor details; some usability limitations.	Setup instructions unclear or incomplete; system difficult to use; UI confusing or inconsistent.
